

ACMSF Forward Work Plan 2020/21

Last reviewed October 2020

This work plan shows the main areas of ACMSF's work over the next 12 to 18 months. It should be noted that the Committee must maintain the flexibility to consider urgent issues that arise unpredictably, and discussions scheduled in the work programme may therefore be deferred.

ACMSF Terms of reference

To assess the risk to humans of microorganisms which are used, or occur, in or on food, and to advise the Food Standards Agency on any matters relating to the microbiological safety of food.

	Topic	Progress	Expected Output
1	Horizon scanning Horizon scanning workshop for members to assess emerging microbiological issues of concern and rank issues in terms of strategic priority and urgency	Workshop was held in June 2020. The Committee will consider at the October 2020 plenary meeting the finalised version of the output from the June horizon scanning workshop.	List of outputs from the workshop including short-listed priorities for more in-depth consideration.
2	Newly Emerging Pathogens The Newly Emerging Pathogens Working Group provides advice on the significance and risks from newly emerging or re-emerging pathogens through food chain exposure pathways.	Continuous.	The Committee to draw the FSA's attention to any risks to human health from newly emerging pathogens via food.

3 Microbiological Surveillance of food

The Surveillance Working Group provides advice as required in connection with the FSA's microbiological food surveillance programme and any other surveillance relevant to foodborne disease.

Working group activities are continuous.

Surveillance Working Group/Committee comments on survey protocols and survey results for consideration by FSA in their microbiological food surveillance activities.

4 Developing trends in relation to foodborne disease

The Committee receives updates on research, surveys, investigations, meetings and conferences of interest.

As issues arise.

Updates will be provided based on the October 2020 and January 2021 EFIG¹ meetings.

ACMSF provides comments on the updates it receives for the FSA's consideration.

¹ Epidemiology of Foodborne Infections Group

5	International and EU developments on the microbiological safety of food	The Committee is updated on issues of relevance and significant developments at an EU and international level on microbiological food safety, such as EFSA opinions and Codex Committee on Food Hygiene meetings.	As issues arise.	ACMSF to note updates and provide comments if desired.
6	Microbiological incidents and outbreaks	The views of the Committee will be sought where necessary and updates provided on outbreaks of significance.	As issues arise.	ACMSF assessment of the risks in relation to significant microbiological outbreaks/incidents.
7	Antimicrobial resistance ACMSF's role through its Working Group on AMR is to assess the risks to humans from foodborne transmission of antimicrobial-resistant microorganisms and provide advice to the FSA.	The subgroup considers developments and emerging issues in relation to antimicrobial resistance and the food chain. Working group activities are continuous. Summaries of discussions and recommendations are provided at plenary meetings.	ACMSF assessment of the key risks to the food chain which may have consequences for human health and identification of key research or surveillance gaps in relation to the food chain.	

<p>8 Social science research relating to microbiological food safety risks</p>	<p>The Committee will receive updates on the findings of social science research which may have a bearing on the assessment of microbiological food safety risks.</p>	<p>ACMSF to note updates and provide comments if desired.</p>
<p>9 FSA Board's New Approach in relation to Rare Burgers</p>	<p>The Committee will be updated on work the FSA is undertaking following the FSA Board's decision on rare burgers.</p>	<p>Committee to be kept informed of progress and to contribute to the work where appropriate.</p>
<p>10 Changes to plant protection product MRLs: potential impact on food safety</p>	<p>Members were alerted to the issue of changes to maximum residue levels (MRLs) for chlorate residues in food, quaternary ammonium compounds (QACs) and biocidal actives which are used as disinfectants/sanitiser in the food industry at previous plenary meetings. The Committee agreed to the FSA's suggestion to setup a cross SAC working group to facilitate a full discussion to take place.</p> <p>Committee will receive an update on the group's activities when this is available.</p>	<p>ACMSF to consider the evidence in this area with respect to impacts on food safety and to provide advice to the FSA.</p>

11 Food Standards Agency and Food Standards Scotland Risk Analysis guidelines	The Committee will be updated on the FSA and FSS's risk analysis guidelines at a future plenary meeting.	ACMSF's comments on the risk analysis guidelines for FSA and FSS to consider.
12 Tickborne Encephalitis virus risks to public health	Committee will be asked to comment on a draft assessment of public health threats (risk to the food chain at a national level) from Tickborne Encephalitis virus at a future meeting.	The Agency is looking for endorsement of this assessment and the overall risk via the food chain from the Committee.
13 Review of the ACMSF report on vacuum packaging and associated processes	Committee will discuss the subgroup on non-proteolytic <i>C. botulinum</i> and vacuum and modified atmosphere packaged foods recommendation for the ACMSF report vacuum packaging and associated processes published in 1992 to be reviewed and to identify priority areas of work for consideration at the October 2020 meeting.	The Agency is seeking priority areas for the proposed review of this report.
14 STEC Research in Scotland	Committee will receive a presentation from Food Standards Scotland on STEC research in Scotland at the October 2020 meeting.	ACMSF to note findings and provide comments if desired.
