

ADVISORY COMMITTEE ON THE MICROBIOLOGICAL SAFETY OF FOOD

INFORMATION PAPER

Guidelines for the safe preparation, storage and handling of powdered infant formula

These guidelines have been published by the World Health Organization (WHO) in collaboration with the Food and Agriculture Organization of the United Nations (FAO). They were produced following two expert meetings in 2004 and 2006 on *Enterobacter sakazakii* and other microorganisms in powdered infant formula.

The Guidelines can be found on the WHO website at the following link:
