INFORMATION PAPER

Health effects of climate change: DH/HPA Report

A report authored jointly by the Department of Health (DH) and the Health Protection Agency was published on 12 February 2008 updating an earlier report, published in 2001/2002, by DH on the health effects of climate change. The report contains a chapter on foodborne disease and climate change.

The report can be viewed on the DH website at the following address:
