

ADVISORY COMMITTEE ON THE MICROBIOLOGICAL SAFETY OF FOOD

INFORMATION PAPER

LACORS/HPA Co-ordinated Food Liaison Group Studies

Three Reports of LACORS/HPA Co-ordinated Food Liaison Group studies have been published on the following topics:

- Microbiological Study on Salmonella Contamination of Pooled Raw Shelled Egg Mix and Environmental Samples from Catering Establishments
- Assessment of the Microbiological Safety of Edible Nut Kernels on Retail Sale in the UK with a focus on *Salmonella* spp.
- Assessment of the Microbiological Safety of Speciality Meats from Markets and Small Specialist Retailers, with a focus on *Salmonella* spp. and *Listeria monocytogenes*

All three reports can be found on the HPA website at the following link:
